

Homework 4 Submission Pseudocode

LOGIC FLOW: Homework 4 Initialization (initHomework4)

```
START
  // Step 1: Fetch External Data
  CALL fetchStates()
  IF fetch is successful
    UPDATE #state element with data from "states.html"
    CALL loadFromLocalStorage() // Load values AFTER states are loaded
  ELSE
    DISPLAY "Error loading states"
  END IF

  // Step 2: Handle Cookies
  READ cookie "firstName"
  IF firstName is NOT EMPTY
    DISPLAY "Welcome back, [firstName]" in header
    SHOW "Not [firstName]?" checkbox
    SET #fname.value = firstName
  ELSE
    DISPLAY "Welcome New user" in header
    HIDE "Not you?" container
  END IF

  // Step 3: Persistence Setup
  FOR EACH input WITH class ".save-local"
    ADD event listener for "blur" and "change"
    ON EVENT: CALL saveFieldToLocal(this_field)
  ENDFOR

  // Step 4: Handle "Start Over" (Not you?)
  ON "Not you?" CHECKBOX CHANGE:
    IF checked
      IF user confirms "Start Over"
        DELETE cookie "firstName"
        CLEAR localStorage
        RESET form
        RELOAD page
      END IF
    END IF
```

END
